March 28, 2011

FOR IMMEDIATE RELEASE

MEDIA ADVISORY

What: SH 361 Proposed Improvements Citizen's Meeting
When: Tuesday, March 29, 2011 at 5:30 – 7:30 p.m. Presentation: 6:30 p.m.
Where: Port Aransas City Hall, 701 West Avenue A

The proposed improvements includes one additional travel lane in each direction, a raised median along the 2.8 mile project length creating a boulevard-type roadway, left-turn bays at intersections where warranted and feasible, and hike and bike improvements on the Gulf (east) side of the roadway extending from Avenue G to Beach Access Road 1. The project will be built within existing right of way, except for a sidewalk easement needed at the southeast corner of the Avenue G intersection.

The purpose of this project is to improve safety, reduce traffic congestion, and enhance pedestrian and bicycle safety and mobility. As growth on North Padre Island and Mustang Island accelerates and traffic increases, congestion and safety are growing concerns.

The public meeting is an important step in the environmental permitting process. The project is included in the Statewide Transportation Improvement Plan (STIP), so engineering and design phases are funded, but funding for the future construction of the proposed project is not yet identified.

Interested individuals who are unable to attend the meeting are encouraged to submit their comments to S.H. 361 Project, c/o Marcos Ybarra, P.E., 1701 S. Padre Island Drive, Corpus Christi, Texas, 78416, or email comments to Marcos.Ybarra@txdot.gov. TxDOT is accepting written comments from the public until Tuesday, April 12, 2011. For additional information regarding this meeting or about this project, contact Marcos Ybarra at TxDOT, (361) 808-2294.

TxDOT's six goals:

Prepare for the future
Maintain the transportation system
Work with our partners to identify funding strategies

Enhance safety
Relieve congestion
Enhance connectivity
